

CREDENTIALS

Certifications & Professional Development

Immigration law firms hire Beamreach to build automation that handles real casework. These credentials reflect hands-on training in the specific platforms and AI systems we work with — not general software certifications.

CLIO

Clio Legal AI Certification

Clio Legal AI Accelerator · 2026

PRESENTED BY  Clio

CERTIFICATE OF COMPLETION

This certifies successful completion of

THE LEGAL AI FUNDAMENTALS CERTIFICATION

Iliia Dubovskii

Awarded in recognition of successfully completing the Legal AI
Fundamentals Certification for legal professionals.

This certification demonstrates proficiency in key areas including AI
prompting best practices, cybersecurity considerations, evaluating AI tools,
and applying modern AI solutions in real-world legal settings.

The Intelligent Legal Work Platform

Date Issued: July 2026

www.clio.com

What this covers

The Clio Legal AI Certification is part of Clio's Legal AI Accelerator — a structured program designed to train legal professionals on AI fluency in practice. The curriculum covers AI fundamentals in legal contexts, repeatable AI systems for law firms, legal research and drafting with AI, and AI risk management and governance.

The certification is CLE-eligible, recognized by state bar associations as qualifying continuing legal education — the same credentialing framework attorneys use to maintain their licenses.

ClioCon 2026 — Virtual Attendee

Clio's annual legal technology conference. Product sessions, attorney roundtables, and direct access to Clio's product and partnership teams. Attended virtually in 2026.

Clio Academy — Product Training

Completed Clio Academy's on-demand training tracks covering Clio Manage, Clio Grow, and Clio Manage AI. Platform-specific training on the systems we configure and integrate for immigration practices.

ANTHROPIC

AI Fluency: Framework & Foundations

Anthropic · University College Cork · 2026

Ilia Dubovskii

has completed

AI Fluency: Framework & Foundations

ANTHROPIC

What this covers

Anthropic's AI Fluency program, delivered in partnership with University College Cork (UCC), Ringling College of Art + Design, and Ireland's Higher Education Authority. Covers AI frameworks, responsible AI foundations, and practical application of large language models — grounded in academic standards rather than vendor marketing.

Claude 101

Anthropic · 2026

Claude 101

ANTHROPIC

What this covers

Anthropic's foundational training on Claude — the AI model powering the automation agents we build for immigration firms. Covers prompt engineering, tool use, context management, and working with Claude's API. Directly applicable to every AI agent we build and maintain.

Why this matters when you hire an automation consultant

Credentials from three independent sources — Clio (the legal practice management platform), Anthropic (the AI company behind the Claude models we build on), and academic institutions — reflect the full stack of what we actually work with.

The Clio certifications mean we know how the platform works in practice: its API, document structure, matter workflows, and Clio Manage AI. The Anthropic certifications mean we know

how to build reliably with Claude — not just prompt it, but architect agents that don't hallucinate, handle edge cases, and stay within cost budgets.

It also means we stay current. Both Clio and Anthropic ship updates frequently. The retainer relationship we offer is partly about making sure your automations stay aligned with how the underlying platforms evolve.

Ready to make Clio work harder for your immigration practice?

30-minute call. We'll look at your current setup and identify exactly where automation saves the most time.
